RE: City-wide paving projects

Dear Resident,

Beginning in July, the City of Attleboro will be paving a portion of County Street (County Square to entrance of Capron Park), Thatcher Street (South Main Street to Grant Street), Bank Street (Park Street to Peck Street), Peck Street (Bank Street to Pleasant Street), Mechanic Street (Dennis Street to Third Street), Third Street (Mechanic to Franklin Street), Riverbank Road (County Street to Cliff Street), Read Street (838 Read Street to Phillips Street) Oakland Avenue (County Street to crest of 25 Oakland Avenue))

Construction on each road segment typically is completed in a couple of stages, and it is weather dependent. First, roadways are milled with a machine (the top surface of the pavement is removed) and then utility structures are reset to grade. Following this, City contracted crews will return to lay the top surfaces of asphalt. Each of these phases should be completed within a week or two. Signage will be posted along the street when work is to be performed. We ask that you please help us observe the construction zone so that we can efficiently conduct the work and minimize impacts to everyone. **All utility upgrades on the listed roadways should be performed, before the resurfacing project begins, as a five (5) year roadway opening moratorium will be placed on all of the listed roadways, upon completion of the resurfacing work.**

We recognize that roadway construction may also bring dust and noise. Please accept our advance apologies for any inconvenience caused.

Your patience is very much appreciated. If you have any questions, or need more information, please contact me at 508-223-2222, ext. 3154 or by e-mail at dpwsupervisor@cityofattleboro.us.

Respectfully,

Michael Tyler
