

Now is a Great Time to Sign Up for Attleboro Community Electricity Aggregation and Lower Your Electric Bill!*

The Attleboro Community Electricity Aggregation is a program offered by the City to provide residents and businesses with more electricity supply options and to keep electricity rates stable and competitive*. New National Grid rates make Attleboro Community Electricity Aggregation a better option than ever! National Grid rates increased more than 5¢/kWh on November 1 for residential customers. This would cost an average household an additional \$30/month for the Supply Services portion of their electricity bill (assumes 600 kWh per month).

***Required disclaimer from the Department of Public Utilities:** Future savings cannot be guaranteed because future National Grid rates (beyond April 2022) are unknown.

You can enroll on the Attleboro Community Electricity Aggregation website MassCEA.com/Attleboro.

All you need is your Account Number and Customer Name Code, both found on your National Grid bill. You can check if you are already enrolled in the Attleboro Community Electricity Aggregation program by looking at your bill: in the Supply Services section, the Supplier should be “Constellation NewEnergy (Attleboro Agg)”.

You can use the calculator to compare the rates on the Attleboro Community Electricity Aggregation website MassCEA.com/Attleboro. You can also opt into 100% Green (\$0.14019/kWh) and have 100% of your electricity come from a renewable resources in our region!

The Attleboro Community Electricity Aggregation program options are:

Standard	50% Green	100% Green	National Grid Basic Service (residential customers)
\$0.10470/kWh	\$0.12244/kWh	\$0.14019/kWh	\$0.14821/kWh
January 2021 - December 2023			November 2021- April 2022
