RE: Citywide paving projects

Dear Resident,

Beginning next month, the City of Attleboro will be resurfacing Richardson Avenue and Wall Street. This work is being performed utilizing funds from the State's Winter Recovery Assistance Program (W.R.A.P.) W.R.A.P. provides supplemental funding for cities and towns to improve their transportation networks in response to harsh winter weather.

Construction on each road segment typically is completed in a couple of stages, and it is weather dependent. First, roadways are milled with a machine (the top surface of the pavement is removed) and then utility structures are reset to grade. Following this, City contracted crews will return to lay the top surfaces of asphalt. Each of these phases should be completed within a week or two. Signage will be posted along the street when work is to be performed. We ask that you please help us observe the construction zone so that we can efficiently conduct the work and minimize impacts to everyone. All utility upgrades on the listed roadways should be performed, before the resurfacing project begins, as a five (5) year roadway moratorium will be placed on the listed roadways, upon completion of the resurfacing work.

We recognize that roadway construction may also bring dust and noise. Please accept our advance apologies for any inconvenience caused.

Your patience is very much appreciated. If you have any questions, or need more information, please contact me at 508-223-2222, ext. 3161 or by e-mail at dpwsupervisor@cityofattleboro.us.

Respectfully,

Michael Tyler
