

FOR IMMEDIATE RELEASE

Attleboro Community Electricity Aggregation program, launched in January 2016 and part of a 25-community electricity buying group, has been renewed through the end of 2023

Attleboro, MA – The city of Attleboro announces that it has renewed its electricity aggregation program for another 35 months starting in January 2021. **No action is required on the part of the current program participants** as they will continue their electricity service automatically with the new supplier, Constellation.

The Attleboro CEA program is part of a larger electricity purchasing group, providing Attleboro residents and businesses with competitive choice and longer-term price stability. During the first five years of the program, it has provided significant value to the community.

The new default program rate is \$0.10470 per kilowatt hour (kWh) from January 2021 through December 2023; this default rate meets all state renewable electricity standards. The National Grid Residential Basic Service electricity rate is \$0.12388/kWh for the six-month period from November 2020 through April 2021. In addition, the program also offers two options with more renewable electricity than required by state law. More information about the program and all the options can be found on the program website masscea.com/Attleboro.

The program rates, resulting from a competitive bid, are fixed over the 35 months of the electric supply agreement (ESA) from January 2021 through December 2023. The Attleboro CEA product offerings and rates will be:

National Grid rate	Attleboro default rate		
Basic service (residential customers)	CEA optional rates		
Meets state renewable electricity standards	Attleboro Local Green 50%	Attleboro Local Green 100%	
\$0.12388/kWh	Meets state renewable electricity standards	50% in addition to state renewable electricity standards	100% in addition to state renewable electricity standards
Duration November 2020- April 2021	\$0.10470/kWh	\$0.12244/kWh	\$0.14019/kWh
<p align="center">Duration: January 2021 - December 2023</p> <p>Products described as Green contain renewable electricity above that required by state law. The additional renewable electricity qualifies for MA Class I designation. Local refers to geographic areas permitted under MA Class I designation, namely New England, New York and eastern Canada.</p>			

Disclaimer: Savings cannot be guaranteed as compared to Basic Service rates which change every six months for residential and commercial accounts and every three months for industrial accounts.

Current Attleboro residents and businesses who are participating in the CEA program will be automatically transitioned to the new default electricity rate as of their January 2021 meter read date.

Those who do not want to participate in Attleboro CEA can opt out without penalty or change to a different program option at any time on the program website masscea.com/Attleboro or by calling the supplier Constellation at 833-461-0813.
