Attleboro Retirement Board
77 Park Street
Attleboro, MA 02703

To the Attleboro Retirement Board:

For the purpose of satisfying the requirements of the Government Accounting Standards Board (GASB) Statement No. 68, Stone Consulting, Inc. has prepared a set of illustrative tables and other Required Supplementary Information (RSI) based on the January 1, 2018 actuarial valuation of the Attleboro Retirement System performed by Stone Consulting, Inc.

The valuation and this report were prepared using generally accepted actuarial principles and practices and meet the parameters set by the Governmental Accounting Standards Board (GASB).

To the best of our knowledge, this report is complete and accurate, and the assumptions used represent our best estimate of anticipated experience of the system. Stone Consulting, Inc. is completely independent of the City of Attleboro and the Attleboro Retirement System. This includes any of its officers and key personnel. Neither we or anyone else closely associated with us has any relationship with the City of Attleboro or the Attleboro Retirement System that would impair our independence, other than this or related assignments.

We are pleased to present these exhibits. If the Board has any questions on the content of this report, we would be glad to respond. Please note that this report is meant to be used in its entirety. Use of excerpts of this report may result in a misleading or inaccurate understanding of the results.

The undersigned is a consultant for Stone Consulting, Inc. and a member of the American Academy of Actuaries and meets the Qualification Standards of the American Academy of Actuaries to render the actuarial opinion contained herein.

Respectfully submitted,
STONE CONSULTING, INC.
Actuaries for the Plan

Lawrence B. Stone
Member, American Academy of Actuaries

Summary of Results

This report has been prepared for the purpose of satisfying the requirements of GASB Statements No. 67 and 68. For GASB 67 the results are as of a valuation date of January 1, 2018 and a reporting date of December 31, 2018. For GASB 68 the results are as of a valuation date of January 1, 2018, a measurement date of December 31, 2018 and a reporting date of June 30, 2019.

The methods, assumptions, and plan provisions used to prepare these exhibits are consistent with those used in the funding valuation, and are outlined in the January 1, 2018 funding valuation report unless otherwise stated in this report.

Highlights of the results for the Attleboro Retirement System as of December 31, 2018 are as follows:

Total Pension Liability (TPL)	\$ 240,385,572
Plan Fiduciary Net Position (FNP)	<u>138,909,396</u>
System's Net Pension Liability (NPL)	\$ 101,476,176
Plan FNP as a percentage of the TPL	57.8%
Covered Payroll	\$ 35,924,604
Plan NPL as a percentage of Covered Payroll	282.5%
Pension Expense	\$ 16,944,291

NOTE: Totals in this report may not sum due to rounding

The TPL, FNP, and NPL are all developed and discussed on the following two pages, followed by the pension expense and deferrals.

Distribution of the Member Population

As of January 1, 2018, the following employees were covered by the benefits terms:

Inactive employees or beneficiaries currently receiving benefits	435
Inactive employees entitled to a return of contributions	153
Active employees	<u>647</u>
TOTAL	1,235

Changes to the Net Pension Liability

	Total Pension Liability (a)	Fiduciary Net Position (b)	Net Pension Liability (a) - (b)
Balances at beginning of Measurement Period (01/01/2018)	\$ 231,595,241	\$ 148,012,737	\$ 83,582,504
Changes for the Year:			
Service Cost	4,936,726		4,936,726
Interest	17,237,983		17,237,983
Change in benefit terms	0		0
Differences between expected and actual experience	0		0
Change in assumptions	0		0
Contributions - employer		7,270,640	(7,270,640)
Contributions - employee		3,557,601	(3,557,601)
Net investment income		(6,328,703)	6,328,703
Benefit payments, including refunds of employee contributions	(13,384,378)	(13,384,378)	0
Administrative expense		(218,502)	218,502
Other changes		0	0
Net Changes	<u>8,790,331</u>	<u>(9,103,341)</u>	<u>17,893,672</u>
Balances at end of Measurement Period (12/31/2018)	\$ 240,385,572	\$ 138,909,396	\$ 101,476,176

*Update procedures were used to roll the Total Pension Liability forward from the valuation date (01/01/2018) to the measurement date (12/31/2018). [GASB 68, Paragraph 80 c.]

CHANGES IN METHODS, ASSUMPTIONS, AND PLAN PROVISIONS

This report is based on the results of the same valuation as the prior year's GASB report. With no new valuation results to reflect, there are no changes in assumptions or plan provisions to be reflected in this report.

Projection of the Net Pension Liability

TOTAL PENSION LIABILITY (TPL)

The Total Pension Liability at the beginning of the measurement period (01/01/2018) is equal to the TPL from the end of the previous measurement period. The TPL is rolled forward through each measurement period by:

- Adding the Service Cost,
- Subtracting benefits paid,
- Applying interest (as calculated on page 7), and
- Recognizing any changes from new valuation results.

The Actuarial Accrued Liability (AAL), calculated as of the valuation date, is compared to the projected TPL. The difference between the two figures is measured as of the measurement date, and allocated to the following categories:

- Changes in assumptions
- Changes of plan provisions
- The remainder of the difference is allocated to "Differences between actual and expected experience"

All of these changes are recognized immediately in the TPL. Their treatment in the pension expense is discussed on the following page. Note that the TPL shown includes a 1/1/2018 liability of \$1,743,766 for net 3(8)(c) payments, calculated by assuming that every dollar of 3(8)(c) net benefit generates the same amount of liability as a dollar of the total retirement benefit, and rolled forward along with the rest of the TPL. This method differs from the funding valuation, where net 3(8)(c) payments are funded on a pay-as-you-go basis and no explicit liability is calculated.

PLAN FIDUCIARY NET POSITION (FNP) AND NET PENSION LIABILITY (NPL)

GASB Statement No. 68, Paragraph 59 requires that the fair value of assets be used for the Fiduciary Net Position. For the fair value of assets we used the market value of assets adjusted by payables and receivables.

The Net Pension Liability (NPL) is the portion of the TPL not covered by the FNP. This amount is presented as a percentage of covered payroll. The NPL ratio for the Attleboro Retirement System is 282.5% of covered pay. In this report, covered pay is reported as described in GASB Statement No. 82 – pensionable payroll for the measurement period.

PENSION EXPENSE AND NET DEFERRALS

For the Pension Expense, gain and losses are recognized over a period of multiple years, with a portion being recognized immediately and the remainder being added to deferred inflows and outflows:

- Asset gains and losses are recognized over a five-year period [GASB 68, Paragraph 71b]
- Experience and Assumption changes are recognized over the average future service of the current members [GASB 68, Paragraph 71a]. The current members include retirees and inactive who have no future service.
- Plan provision changes are recognized immediately

Some inflows/outflows which originated in prior measurement periods will continue to be recognized this period. The total amount to be recognized this period is part of the pension expense; the remainder is included in the deferrals. Both are shown on the following page, and are calculated in greater detail on pages 10-11.

RESULTS BY EMPLOYER

Exhibits are provided beginning on page 14 which provide individual results for the various employers that make up the Attleboro Retirement System. Pension expense, as well as any deferred inflows and outflows of resources, and any excess contribution generated by Federal Grants, have been allocated to the various employers in the same manner as the FY2019 appropriation.

Per GASB 68, the change in proportionality from FY2018 to FY2019 if the individual employers' NPL and deferred inflows and outflows need to be allocated to the individual employers. This is calculated on page 17. These amounts are then recognized over the average remaining service, which is 5.8 years. The recognition of proportion changes is developed on page 18.

Pension Expense for the Fiscal Year Ended June 30, 2019

NOTE*	Description	Fiscal 2019
A	Service Cost	\$ 4,936,726
A, B	Interest on the Total Pension Liability	17,237,983
C	Differences between Expected and Actual Experience	1,625,547
D	Changes of Assumptions	3,004,532
D	Changes to Benefit Provisions	0
A	Employee Contributions	(3,557,601)
E	Projected Earnings on Pension Plan Investments	(10,996,906)
F	Differences between Projected and Actual Earnings on Plan Investments	4,475,508
A	Pension Plan Administrative Expense	218,502
A	Other Changes in Fiduciary Net Position	0
	Total Pension Expense	\$ 16,944,291

* Notes shown on following page.

Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

	Deferred Outflows Of Resources	Deferred Inflows Of Resources
Differences between expected and actual experience	\$ 3,466,893	\$ 0
Changes of assumptions	9,640,972	0
Net difference between projected and actual earnings on pension plan investments	<u>10,283,796</u>	<u>0</u>
TOTAL	\$ 23,391,661	\$ 0

Year Ending December 31, *	Recognition
2019	\$ 8,474,538
2020	\$ 5,813,875
2021	\$ 3,728,637
2022	\$ 5,374,610
2023	\$ 0
Thereafter	\$ 0

*The years are based on measurement date. For GASB 68, the year ending December 31, 2019 is Fiscal 2020.

NOTES

- A. See the RSI schedule of changes to the net pension liability, on page 3.
- B. Events that impact the total pension liability are assumed to happen evenly throughout the period. In addition, the amount of interest on the total pension liability is calculated using an interest rate equal to the discount rate that was used to determine the service cost. The amount is determined as follows:

Description	Amount for Period (a)	Portion of Period (b)	Interest Rate (c)	Interest on the TPL (a) x (b) x (c)
Beginning TPL	\$ 231,595,241	100%	7.50%	\$ 17,369,643
Service cost	4,936,726	100%	7.50%	370,254
Benefit payments	(13,384,378)	50%	7.50%	(501,914)
Total interest on the NPL				\$ 17,237,983

- C. Differences between expected and actual experience recognized in the current period in accordance with paragraph 71a of Statement 68. For the detailed calculation of the recognition of this amount, see the schedules on page 10.
- D. Assumption and plan provision changes recognized in pension expense in the current period in accordance with paragraph 71a of Statement 68. For detailed calculation of the recognition of these amounts, see the schedule on page 10.
- E. Changes in the amounts invested are assumed to occur evenly throughout the period. In addition, the amount of projected earnings on pension plan investments is calculated using the assumed rate of return on pension plan investments as of the beginning of the period. The amount is determined as follows:

Description	Amount for Period (a)	Portion of Period (b)	Projected Rate of Return (c)	Projected Earnings (a) x (b) x (c)
Beginning FNP	\$ 148,012,737	100%	7.50%	\$ 11,100,955
Employer contributions	7,270,640	50%	7.50%	272,649
Employee contributions	3,557,601	50%	7.50%	133,410
Benefit payments	(13,384,378)	50%	7.50%	(501,914)
Administrative expense and other	(218,502)	50%	7.50%	(8,194)
Total projected earnings				\$ 10,996,906
Actual investment earnings				<u>(6,328,703)</u>
Difference: (Gain)/Loss				\$ 17,325,609

- F. Differences between projected and actual earnings recognized in the current period in accordance with paragraph 71b of Statement 68. For detailed calculation of the recognition of this amount, see the schedule on page 10.

Discount Sensitivity

The following presents the Attleboro Retirement System's Net Pension Liability calculated at the valuation discount rate of 7.50%, as well as at discount rates one percent lower (6.50%) and one percent higher (8.50%).

Fiscal Year	1% Decrease (6.50%)	Current Discount Rate (7.50%)	1% Increase (8.50%)
2019	\$ 125,217,218	\$ 101,476,176	\$ 81,367,245

Long-Term Expected Real Rate of Return

The long-term expected real rate of return reflects the expected rate of return on plan assets minus the expected rate of inflation. Note that the discount rate includes the effect of inflation. The long-term real rate of return removes the effect of inflation on the return amounts. It is a long-term assumption and is meant to reflect a best estimate of future experience, based on the expected asset allocation. This section, along with the money-weighted rate of return, has been removed as the retirement trust is not expected to issue a financial statement under GASB 67, and GASB 68 does not require this section.

Development of Results

DISCOUNT RATE

Projections were made using a discount rate assumption of 7.50%, which is consistent with the actuarial funding valuation. One of the objectives of the provisions of GASB 68 is to examine how benefit payments and plan contributions and investment earnings interact on a cash flow basis. GASB requires that these amounts be calculated with Market Value of Assets and using the Entry Age Normal cost method.

Projected contributions for each year are the sum of:

- Projected normal cost,
- Amortization of the unfunded liability,
- Administrative expense, and
- Other benefit costs such as 3(8)(c) payments.

The amortization bases and periods are consistent with those seen in the valuation report. Administrative expenses are increased by 4.50% per year. The Attleboro Retirement System's Fiduciary Net Position was projected to be available to make all future benefit payments of current active and inactive employees. Thus, the long-term expected rate of return on investments was applied for all benefit periods when calculating the Net Pension Liability.

The long-term rate of return which was used to develop the discount rate of 7.50% includes the effect of inflation (not subtracted out as in the real rates of return). It is based on a combination of expected rates of return on the mix of current and expected investments over a long-term period. These expectations are based on current market conditions, historical experience and future expectations. It assumes a rebalancing of assets on an ongoing basis as well as a constant monitoring of asset allocation and manager performance.

EXHIBITS

The recognition and deferral of various gains and losses are developed on the following two pages. These are followed by historical exhibits displaying changes in the NPL and contribution amounts for past years, and the exhibits which display results by employer.

Increase / (Decrease) in Pension Expense Arising from the Recognition of the Effects of Differences between Expected and Actual Experience

Year	Differences between actual and expected experience	Recognition period (years)	2015	2016	2017	2018	2019	2020	2021	2022	2023	2024
